- Data
    - Receival of data from client
    - Comprehension of the different files sent
    - Beginning to look at data clean up
        - Matching pass conditions to batch conditions
- Design/Implementation Decisions
    - What tasks to focus on first [data cleanup]
    - Questions to ask for future implementation
- Meeting with Advisor on Next Steps
    - Discussed data and how to understand the data
    - Emphasis on data cleanup
    - Emphasis on reformation of data for better understanding
    - Need the creation of a manufacturing process
    - Feature Importance
    - Regression analysis → output of values needed
- Task Reallocation
