

Use Cases:

- As a pet owner, I should be able to send out a service request to veterinarians in my area to receive their services.
- As a pet owner, I want to be able to update my pet information so that veterinarians have up-to-date information on my pet, such as age, breed, and previous appointments.
- As a veterinarian, I want to be able to view service requests in my area so choose to accept or ignore a service request.
- As a veterinarian, I want to be able to accept a service request so that I can provide services.
- As a pet owner, I want to be able to input my pet's symptoms and receive a possible diagnosis of my pet's health.
- As a user, I want to be able to view my appointments in my calendar app outside of VetGo, so that I can be reminded when there is an appointment.
- As a veterinarian, I want to be able to view the medical history of the pet that I am performing services on, so that I can have a better understanding of the pet's health.
- As a pet owner, I want to be able to provide the service provider a rating after an appointment, so that other pet owners know how the service was.
- As a veterinarian, I want to be able to provide the pet owner a rating after an appointment, so that other service providers can expect what they are getting into if they choose to accept a service request.
